- Metric DIN 1587 hexagon domed cap nuts are often referred to as acorn cap nuts. These nuts have a smooth rounded head that covers the hex nut base. The domed surface protects the bolt threads underneath while providing a finished appearance and may improve safety in certain circumstances. KOTADIA INC offers one of the most complete ranges of metric nuts and other inch and metric industrial fasteners for immediate delivery from stock. The following sizes of metric DIN 1587 hexagon domed cap nuts are available for immediate shipping from stock: Diameters ranging from M4 to M30 in 303, A2 and marine grade A4 stainless steel in coarse and fine threads.
- DIN (Deutsches Institut für Normung German Institute for Standardization) standards are issued for a variety of components including industrial fasteners as Metric DIN 1587 hexagon domed cap nuts. The DIN standards remain common in Germany, Europe and globally even though the transition to ISO standards is taking place. DIN standards continue to be used for parts which do not have ISO equivalents or for which there is no need for standardization.
